

DUAL STAGE WARNING STRETAGY PANELS Sensor – Power Panel –Sensor Cables

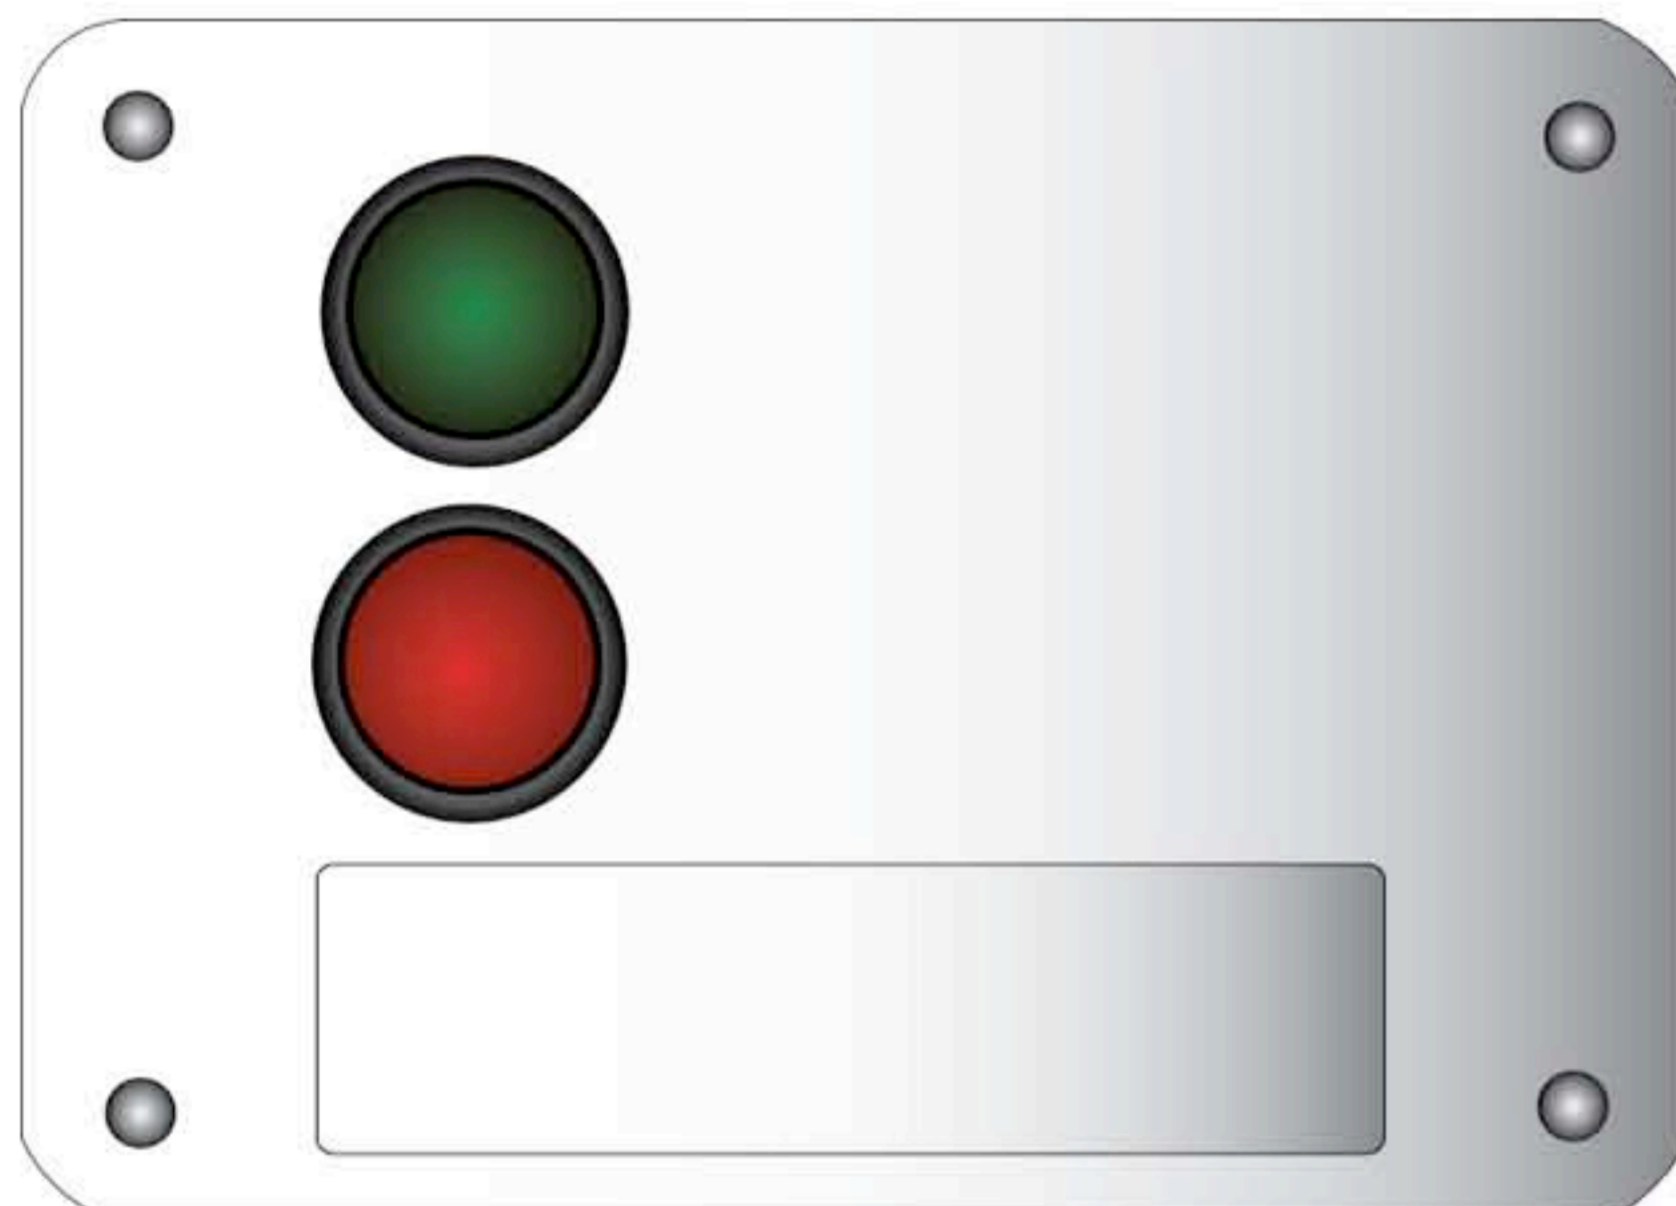

USAPRO Vehicle Gas Detection vapor monitoring systems utilize advanced technology for detection of Propane CNG or LNG - (Compressed or Liquefied Natural Gas), and other hydrocarbon fuel vapors. As required by various regulations - safety documents early warning for driver-audible and visual from outside of cab. Test for driver safety with windows up - doors closed. USA PRO's RED LED easily seen from outside - 90 db audible warning for significant gas concentration levels. Note: CHP Title 13-2008 , NFPA 52-2010 SAE J2343-2009.

All panels include appropriated wiring harness. Safety sicker available by request.
All Panels are standard black wrinkle powder coat. Stainless Steel - brushed by special order.

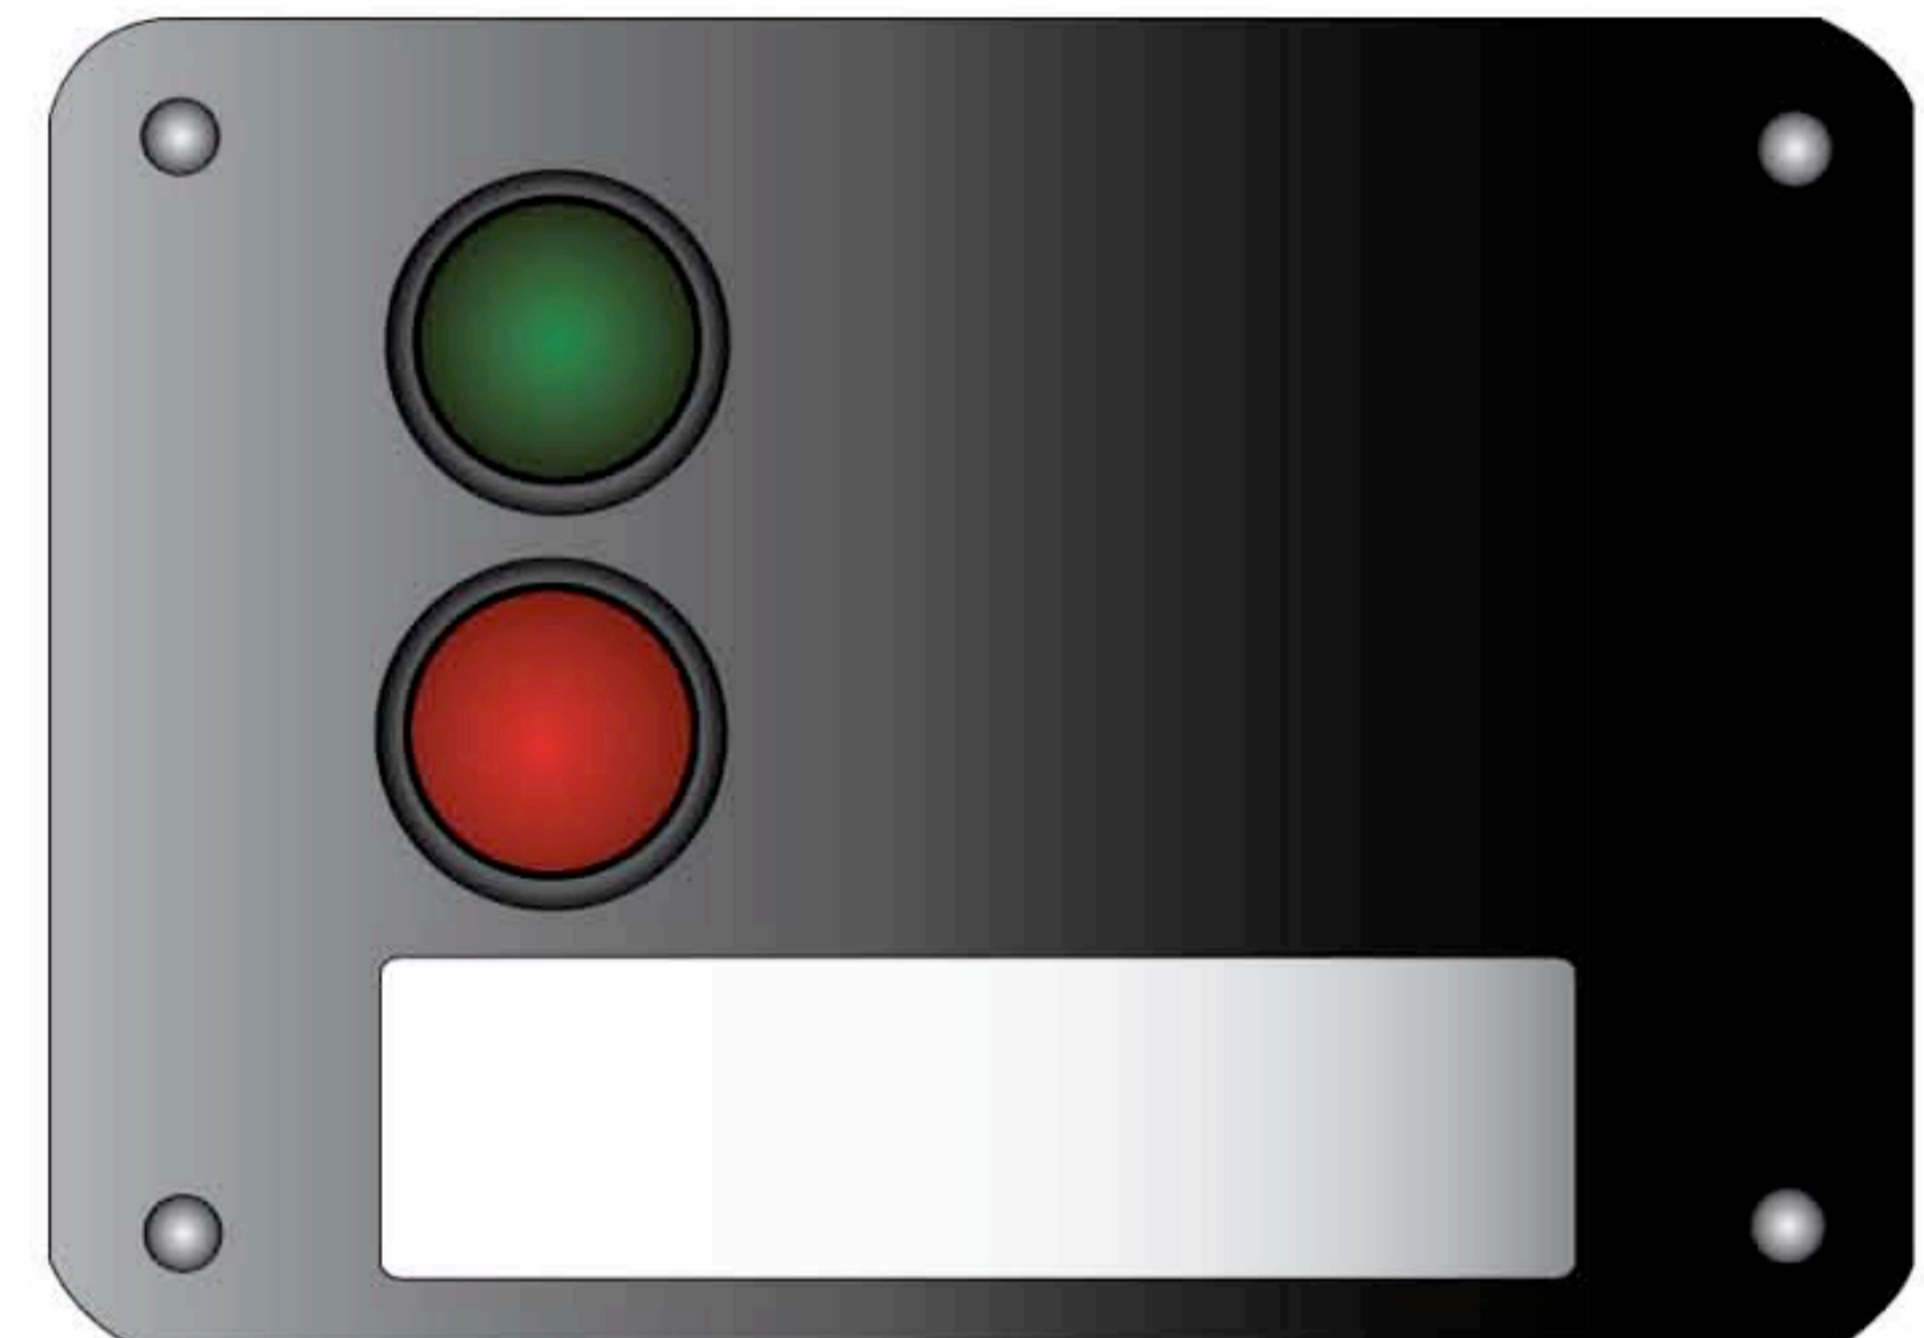

SHL-9001 Panel

3.5 L X 3.0" W
LED's Green – Red
Audible 85 db +

SHL-9002 Panel

NO audible
Auxiliary warning.
Dual drive vehicles with
Primary panels w/audible
3.50" L X 3.0" W or
4.375" X 2.75" W
w/Secondary wire harness

SHL-9003 Panel

4.375"L X 2.75" wide
SHL Gas Sensor
LEDs Green - Red
Audible 85 DB
